

Modern cloud-based security with Ava and Feenics

Proactive Security

Powerful analytics with AI enable to visually capture events as they happen – simplifying operations.

Connecting the Dots With Alerts

If door is propped open or authorization fails – mapview shows location and image in real-time.

Modern Remote Management

Monitor access control & physical security events remotely from any web browser or device.

Find Things Faster

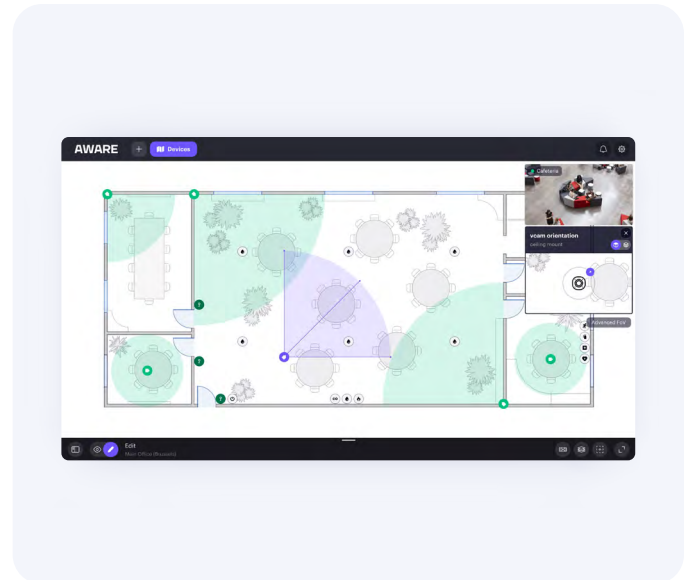

Wicked-fast forensic searches across all locations, reduces burdens on security teams.

Scalable

Fits all sizes – from single door to multi-site enterprises. Scale up easily as needed.

Simplicity

Feenics monitors the health of the system 24 x 7 and proactively alerts customers in the event of the failure.

Simple, open and scalable security

Cameras & sensors

Ava Cameras

Storage, AI and processing on camera
